

MARSH ClearSight

- 85+ REPORT TEMPLATES TO CHOOSE FROM.
- ALL REPORTS CAN BE SENT TO VARIOUS OUTPUT TYPES SUCH AS TO HTML ON SCREEN DISPLAY, VARIOUS VERSIONS OF EXCEL (WITH AND WITHOUT FORMATTING), ADOBE .PDF, MS WORD, .CSV, .RTF, ETC.]

Marsh ClearSight's Enterprise™ has over 85 standard report templates which have a Crystal Reports base, available through a highly intuitive graphical point-and-click interface that allows even a novice user to set up reports that contain complex queries, sorts, and graphs.

The user simply selects a template from the library and determines what section or subsection of claims to include by pointing and clicking on data fields and entering dates and then selecting from a drop down menu of system data fields to define how the information should be sorted and displayed.

Enterprise™ also includes an ad-hoc report template builder which allows users to create basic report templates by clicking and dragging claim, location or transaction fields into the desired report format. All data stored in Enterprise™ is available for reporting. Reports can be filtered, sorted, or grouped by virtually any field in Enterprise™ to meet the client's business needs. Here is a listing of the standard report templates available in Enterprise™:
